11. November 2013

ePortrait develops web-/mobile apps for companies that need to collect digital portrait pictures. In order to expand our product portfolio, we are searching for a

## Product & Project Manager (m/f), SaaS, Berlin, part/full time

### Your tasks and responsibilities

- ☑ You are conceptualizing new features, products and improvements of existing software.
- ☑ You are unifying the requirements of customers, sales, developers, designers, and partners.
- ☑ You are supporting the entire development process by creating wireframes, user stories, process models, and you are working closely with our developers.
- ☑ You are optimizing and improving software based on UX und usability analyses.
- ☑ You are managing the projects to set up new client applications.
- ☑ Together, we will follow ePortrait's vision of creating the ID photography of the 21<sup>st</sup> century.

### Your profile and experiences

- ☑ Experience in software development and / or product management, and project management.
- ☑ Knowledge of software development processes from conceptualization to deployment.
- ☑ Basic development skills: JS, PHP, MySQL, HTML, CSS, or Ruby.
- ☑ Overview, self organization + a blend of flexibility and stubbornness ;-)
- ☑ You are fluent in English and in German.
- ☑ Ideal: Experience in SaaS, working with SCRUM, collaborative UX development (e.g. UXPin).

### Your chance and what we offer

- ☑ Full-/part-time employment at a startup with a solid basis of B2B-clients.
- ☑ A team consisting of experienced founders, developers, and project managers.
- ☑ Flat hierarchies, in-depth orientation, and early assignment of responsibilities.
- ☑ Company-sponsored qualifications, flexible work hours, and company-provided hardware.
